

Even or odd

Make program which take number as input from the console and tells you if it's even or odd.

Input	Output
7	The number is Odd.
2	The number is Even.

Some hints !?!

1. Use some conditional statements.
2. This screenshot is from my OddOrEven console application.
Your program must work the same way.

```
Eneter your number:
7
The number is Odd.
Press any key to continue . . .
```

```
Eneter your number:
2
The number is Even.
Press any key to continue . . .
```
