

## GetMax

Create method GetMax() with three integers for parameters which returns the biggest one of them. Create a program that takes from the console three integers and use your GetMax() method and after this show on the console the biggest one.

```
Enter first number:  
6  
Enter second number:  
8  
Enter third number:  
23  
The biggest number is 23  
Press any key to continue . . .
