Number Comparison

Make program that takes two numbers as input. Compare them and show the result on the Console.

Input	Output
222 & 45	222 is greater than 45.
55 & 55	55 is equal to 55.

Some hints !?!

1. Check if the first number is greater than second.
2. If not check for equals.

```
Enter first number:
222
Enter second number:
45
222 is greater than 45.
Press any key to continue . . .
```

```
Enter first number:
55
Enter second number:
55
55 is equal to 55.
Press any key to continue . . .
```
